Subject: A 300-Mile Pipeline is Not the Answer.

Dear Jason King,

Why has this not become a multi-state issue concerning S. Nevada, Arizona and S California who all depend on the Colorado for water? This should NOT be just about Las Vegas!

Why have I not heard anything about desalination from either the Pacific or the Gulf of Cortez, yes this could even be multi-national those regions of Mexico desperately need water too. Stealing water from N Nevada will not work for long, the ocean needs to be tapped!

Great Basin National Park is an extraordinary place--remote, scenic, and treasured by millions of Americans who value our national park system. Plans to pump millions and millions of gallons from the park's vast ecosystem greatly threaten what is special about this place.

I appeal to you, Mr. King, to dismiss questionable, ecologically-unsound plans to pump and move water from one location in Nevada more than 300 miles to Las Vegas. I appeal to you to respect Nevada's sole national park and make certain the park's resources are sustained for generations to come.

Thank you for your thoughtful consideration.

Sincerely,
Ms. Laura Cannon
