Re: groundwater (pipeline) project

Dear Ms Joseph-Taylor,

I am appalled that this project is even being considered. I believe it is unethical and should not be approved.

Common sense says that if Las Vegas doesn't have the resources to support additional population the City should stop issuing building permits. Growth at any cost should not be an option --- we need to live within our means.

The SNWA has made some questionable moves (follow the money) and I believe they have too much power. Big money usually wins, but I hope that will not be the case in this situation.

Sincerely,

Linda Yudka
