Jason King
NV

Dear King,

We believe the scientific information is overwhelming: Draining 50 billion gallons of groundwater from the Great Basin would devastate Native American communities, rural economies and wildlife habitat over a huge area.

Further, the families and small businesses of Las Vegas, recovering from a brutal recession, cannot afford the huge price tag for this project.

It's important for me that the Great Basin water stays in the Great Basin because of the personal experience that I have of the area. I have led many trips to White Pine County and know how the wildlife depends on the water in this area. As climate change occurs, many of the creatures will migrate north in search for water. The proposed action by SUWA would dry up springs and streams, leaving our wildlife, which is so important to Nevada's economy, without water.

I urge you to deny the applications filed by the Southern Nevada Water Authority and support the best interests of all of Nevada.

Sincerely,

Ms. Marjorie Sill
