Jason King
NV

Dear King,

We believe the scientific information is overwhelming: Draining 50 billion gallons of groundwater from the Great Basin would devastate Native American communities, rural economies and wildlife habitat over a huge area.

Further, the families and small businesses of Las Vegas, recovering from a brutal recession, cannot afford the huge price tag for this project.

I've traveled several times to Fish Springs National Wildlife Refuge and enjoy solitary recreation in the West Desert. Groundwater pumping would dry springs and wetlands and denature Utah's West Desert landscapes.

I urge you to deny the applications filed by the Southern Nevada Water Authority and support the best interests of all of Nevada.

Sincerely,

Mark Clemens
