State Engineer Jason King  
NV

Dear State Engineer Jason King State Engineer King,

We believe the scientific information is overwhelming: Draining 50 billion gallons of groundwater from the Great Basin would devastate Native American communities, rural economies and wildlife habitat over a huge area.

Further, the families and small businesses of Las Vegas, recovering from a brutal recession, cannot afford the huge price tag for this project.

Please deny the demand from the Southern Nevada Water Authority for groundwater rights in White Pine and Lincoln counties. The people of southern Nevada need to learn to and understand how to effectively use and conserve water. The SNWA is doing a good job of teaching these skills, and can do more.

Taking water from other areas of Nevada will only compound the problem in the long run. Requiring responsible water use is a better option for everyone, and longer term solution to our water issues.

Thank you.

Sincerely,

Marylou Seely
