Jason King
NV

Dear King,

We believe the scientific information is overwhelming: Draining 50 billion gallons of groundwater from the Great Basin would devastate Native American communities, rural economies and wildlife habitat over a huge area.

Further, the families and small businesses of Las Vegas, recovering from a brutal recession, cannot afford the huge price tag for this project.

It's important for me that the Great Basin water stays in the Great Basin because of the personal experience that I have of the area. I am Las Vegas resident, and this would not only raise my and my family's water bills, but it could possible damage the surrounding ecosystem. Whatever water is left in the desert needs to stay here. Please don't export our water. It will not increase the amount of water in the desert and could put harmful chemicals in the water that remains. This is a desert, don't dry it up.

I urge you to deny the applications filed by the Southern Nevada Water Authority and support the best interests of all of Nevada.

Sincerely,

Miss Maureen Gregory
