State Engineer Jason King
NV

Dear State Engineer Jason King State Engineer King,

We believe the scientific information is overwhelming: Draining 50 billion gallons of groundwater from the Great Basin would devastate Native American communities, rural economies and wildlife habitat over a huge area.

Further, the families and small businesses of Las Vegas, recovering from a brutal recession, cannot afford the huge price tag for this project.

Finally, I absolutely do not support a project that will lead to increased urban sprawl in Clark County. As residents of the Mojave we need to learn to live within the limits of what the already overtaxed environment of southern Nevada will support. If there is not enough water presently available to sustain projected growth, then we as residents need to look at curbing that growth so that we may live within our means from a resource perspective.

Sincerely,

Michael Eaton
