State Engineer Jason King, State Engineer
NV

Dear State Engineer Jason King State Engineer King, State Engineer,

We believe the scientific information is overwhelming: Draining 50 billion gallons of groundwater from the Great Basin would devastate Native American communities, rural economies and wildlife habitat over a huge area.

Further, the families and small businesses of Las Vegas, recovering from a brutal recession, cannot afford the huge price tag for this project.

We do not need this at that price every time its looked is it going to go up by 15 as this has done ,this has been priced way to high . This vally is way over built for the water here and it time to stop the crazy water and land grabs thats going on.

We has damaged the water here by pumping some much out of the ground that the natural wells here have gone dry WHEN ARE WE AS A PEOPLE GOING to realize that we're destroying the water shed in nevada for profit.

Sincerely,

michael j. archer
