Jason King
NV

Dear King,

We believe the scientific information is overwhelming: Draining 50 billion gallons of groundwater from the Great Basin would devastate Native American communities, rural economies and wildlife habitat over a huge area.

Further, the families and small businesses of Las Vegas, recovering from a brutal recession, cannot afford the huge price tag for this project.

This is an unthinkable act the ground water will never be replaced and once it's gone when what? We need to start thinking long term and conserve the water we use now. Las Vegas does next to nothing to conserve water we should have a strong water conservation program like California.

We urge you to deny the applications filed by the Southern Nevada Water Authority and support the best interests of all of Nevada.

Sincerely,

Mr. Norm Piatt
