Jason King  
NV

Dear King,

We believe the scientific information is overwhelming: Draining 50 billion gallons of groundwater from the Great Basin would devastate Native American communities, rural economies and wildlife habitat over a huge area.

Further, the families and small businesses of Las Vegas, recovering from a brutal recession, cannot afford the huge price tag for this project.

Water is a finite resource - all we ever have and will have is here right now. Water cannot be re-created. Preserving water should be THE first priority for providing all on this planet (humans, plants, animals and microbial life) with this life giving substance.

Should Las Vegas need water to sustain its economic future, it should redefine its contrived existence to support activities beneficial to job creation beyond greed and gluttony in all forms.

We urge you to deny the applications filed by the Southern Nevada Water Authority and support the best interests of all of Nevada.

Sincerely,

Ms. Pamela Alfred
