Jason King
NV

Dear King,

We believe the scientific information is overwhelming. Draining 50 billion gallons of groundwater from the Great Basin would devastate Native American communities, rural economies and wildlife habitat over a huge area.

Further, the families and small businesses of Las Vegas, recovering from a brutal recession, cannot afford the huge price tag for this project.

It's important for me that the Great Basin water stays in the Great Basin because of the personal experience that I have of the area. I live and recreate in the Great Basin area and work in the water industry.

This project proposal is absurd and the people of northern Nevada should not be fueling non-sustainable growth in the southern part of the state with our valuable water resources that are already stretched to their full use both by human and biological uses.

If southern Nevada needs more water they need to focus on water conservation and eliminate wasteful landscape practices particularly on commercial properties.

I urge you to deny the applications filed by the Southern Nevada Water Authority and support the best interests of all of Nevada.

Sincerely,

Mrs. Rebecca Williams
