State Engineer Jason King, State Engineer  
NV

Dear State Engineer Jason King State Engineer King, State Engineer,

We believe the scientific information is overwhelming: Draining 50 billion gallons of groundwater from the Great Basin would devastate Native American communities, rural economies and wildlife habitat over a huge area.

Further, the families and small businesses of Las Vegas, recovering from a brutal recession, cannot afford the huge price tag for this project.

Moving this much water from one water basin to another will have drastic consequences to the regions in northern Nevada. This water belongs to the region where it resides even if they are not using it all today. It is important to leave it where it is and not upset the natural balance of the water basin.

Sincerely,

Reed Williams
