State Engineer Jason King
NV

Dear State Engineer Jason King State Engineer King,

We believe the scientific information is overwhelming: Draining 50 billion gallons of groundwater from the Great Basin would devastate Native American communities, rural economies and wildlife habitat over a huge area.

Further, the families and small businesses of Las Vegas, recovering from a brutal recession, cannot afford the huge price tag for this project.

It is time that Las Vegas learns to economize on these resources, they have the money and resources to do so rather than strip resources from other parts of the state.

Sincerely,

Richard Echeita
