State Engineer Jason King, State Engineer
NV

Dear State Engineer Jason King State Engineer King, State Engineer,

We believe the scientific information is overwhelming: Draining 50 billion gallons of groundwater from the Great Basin would devastate Native American communities, rural economies and wildlife habitat over a huge area.

Further, the families and small businesses of Las Vegas, recovering from a brutal recession, cannot afford the huge price tag for this project.

Don't be like previous State Water Engineers who sold out ignoring the wishes of the people and their own scientific knowledge as to what's best for the ecosystem, animals, and residents.

Sincerely,

Richard Meier
