Mr. King

After the evidence you've seen and heard, surely you're not still considering approval of the SNWA pipeline project which would pilfer essential, life giving water from Eastern Nevada's unique and beautiful environment, killing wildlife and ruining the livelihood of thousands of inhabitants and others.

But in case you are, I'm writting this one additional time to show my strict opposition to the project.

The obscene 15 billion pricetag(it would balloon much higher by project's end, mark my word!)of this scheme pales compared to its destructive consequenses on nature and man.

Please do not pull this awful trigger. Don't buckle to the coniving SNWA and their greedy minions.

Please take courage and stand for the right thing. There is precious little of that going on in government.

Thanks for listening.

Best Regards and Respect,

Sam Marshall
