Mr. King

I believe other solutions are possible to answering the need for water in Southern Nevada rather than diverting it from other parts of the state. I have always practiced water conservation especially since I am aware that I live in the arid West. Simply a growing population does not justify removing water from those who depend upon it.

Southern Nevada Water Authority's proposal will risk the livelihood of both those in Eastern Nevada by draining their resources and those in Southern Nevada who will be forced to pay for expensive project.

Please deny SNWA's request for water rights in the Great Basin.

Nevadans cannot afford this project.
