

10-6-11

Susan Joseph-Taylor  
Nevada Div. of Water Resources

RECEIVED  
2011 OCT -7 AM 11:09  
STATE ENGINEER OF NV

I could not believe they are still working to pump rural Nevada dry, for more development & wasteful practices.

I would be willing to share the water "if" first all conservation of water practices had not been enough?

- Like } NO watering lawns in a desert area
- NO fountains
- NO new developments until all vacant homes are filled.
- NO new development with NO water locally to support it
- NO excesses by Casinos

irrigation to grow food is food

This is desert country - Wake up to what this costs everyone else to support areas with no water.
