State Engineer Jason King
NV

Dear State Engineer Jason King State Engineer King,

We believe the scientific information is overwhelming: Draining 50 billion gallons of groundwater from the Great Basin would devastate Native American communities, rural economies and wildlife habitat over a huge area.

Further, the families and small businesses of Las Vegas, recovering from a brutal recession, cannot afford the huge price tag for this project.

The water of the Great Basin cannot be used to support the growth of Southern Nevada. The flagrant use of water on a myriad of golf courses, pools, etc. in a desert community is negligent behavior.

Sincerely, Suzanne Jensen

Sincerely,

Suzanne Jensen
