Jason King
NV

Dear King,

We believe the scientific information is overwhelming: Draining 50 billion gallons of groundwater from the Great Basin would devastate Native American communities, rural economies and wildlife habitat over a huge area.

Further, the families and small businesses of Las Vegas, recovering from a brutal recession, cannot afford the huge price tag for this project.

It's important for me that the Great Basin water stays in the Great Basin because of the personal experience that I have of the area I have lived in las vegas since 1953 and I have seen the vast over water use of all these developers having to put in all this excessive lawns and plants and trees that use up a large part of the water that we as humans need for our drinking water. All these excess lawns and plants and trees that have been brought into our desert have caused our water supply from lake mead to be diminished drastically.

STOP planting all the water hungry grass and plants and trees before we wil not have enough water for us to drink.

If all these lawns and plants and trees were not planted here, and no more were allowed to be planted, than there would be no need to try to get more water from other areas of our state.

Insteaad of trying to cover up the water problem, please fix the cause of excess use of water by not

- allowing any more lawns and plants and trees to get onto our desert environment and then get rid of
- the having all these developers put in more grass and plants and trees.

STOP the city and county of putting in all these trees in our center road ways that use a lot of water, and electricity, and the excess labor needed to put all these trees.

Thank You, William Kuehl

We urge you to deny the applications filed by the Southern Nevada Water Authority and support the best interests of all of Nevada.

Sincerely,

Mr. William Kuehl
