

State Engineer  
901 So Stewart St, Ste 200Z  
Carson City, NV 89701

11-30-11

Dear State Engineer:

The Southern NV Water Authority's application for rural water rights appears to be just plain thievery - they are trying to steal all of rural Nevada's water.

Based on the size & scope of the proposed groundwater development project I believe that the consequences of the project will be significant and are not in the best interest of the affected area or the state itself.

Respectfully

Dr. Thomas D. Furel  
long time Nevada resident
