

Office of the State Engineer
Attn: Susan Joseph-Taylor
901 S. Stewart St. Suite 2002
Carson City, NV 89701

The human race has been witness to more change in the last 100 years than all of mankind before us.

This is why we must err on the side of caution as far as the proposed pipeline.

We do not need to make mistakes now that will not be able to be undone.

Thank you for hearing my words.

Dario
