

10-2-17

Deputy Administrator Susan Joseph Taylor
Office of the State Engineer
901 S STEWART ST. SUITE 2002
CARSON CITY NV 89701

The large scale plan to pump water to Las Vegas from central and northern Nevada and Utah is an ecological and economic disaster.

The livelihood of hundreds of thousands of businesses, people, animals and ecology would be forever lost.

This project expected to cost billions and not hundreds of billions of dollars benefit the few with economics as their objective.

This is a project that cannot succeed as have other likewise projects that have failed.

STATE ENGINEERS OFFICE
