

**D: Weber Reservoir to Little Dam**

$Q_{ld}$	$Q_{canal\ 1}$	$Q_{canal\ 2}$	$PW_{ld}$
0.0	15.0	12.0	0.0
cfs	cfs	cfs	cfs

Note: Will need to check calculated program water at Little Dam ( $PW_{ld}$ ) against measured gage flow at Little Dam ( $Q_{ld}$ )(??)

Note: Need to update based on pass-through versus hold and release operation.

Note: Need to account for differences between scheduled and actual releases and scheduled and actual diversions into Canals 1 and 2.
