State Engineer Jason King, State Engineer
NV

Dear State Engineer Jason King State Engineer King, State Engineer,

We believe the scientific information is overwhelming: Draining 50 billion gallons of groundwater from the Great Basin would devastate Native American communities, rural economies and wildlife habitat over a huge area.

Further, the families and small businesses of Las Vegas, recovering from a brutal recession, cannot afford the huge price tag for this project.

It is time for us to recognize that the model of unlimited growth is failing and that there are limits we either impose on ourselves or, more cruelly, the natural world will impose them on us.

Sincerely,

Mark Schaffer
