# PUBLIC STAKEHOLDER MEETING TO REVIEW REGULATIONS OF THE NEVADA DIVISION OF WATER RESOURCES PURSUANT TO EXECUTIVE ORDER 2026-003

**Wednesday, October 28, 2026 at 2:00 PM**
Nevada Division of Water Resources
Tahoe Conference Room, 2nd Floor
901 S. Stewart Street
Carson City, Nevada

**You may also participate via Teams or telephone at**
**https://teams.microsoft.com/meet/224646167017241?p=KGbrQY4harAWoYESC2**
**Meeting ID: 224 646 167 017 241**
**Passcode: xQ6QN6JJ**

**Call in by Phone (audio only):** +1 775-321-6111
**Phone Conference ID**: 179 779 359#

**The Nevada Division of Water Resources (NDWR) will hold a public stakeholder meeting pursuant to Executive Order 2026-003 to solicit recommendations on regulations that may be streamlined, clarified, amended, or repealed. The meeting will provide an opportunity for stakeholders to offer input on existing regulations and identify opportunities to improve regulatory clarity, efficiency, and effectiveness.**

## STAKEHOLDER INPUT PROCEDURE

Stakeholder input will be accepted following each agenda item, providing stakeholders with an opportunity to offer input and feedback before any action is taken.

Stakeholder input should be brief and concise to allow all interested individuals an opportunity to speak. Comments will be limited to **three (3) minutes per individual**. Stakeholder input will not be restricted based on viewpoint.

A **Public Stakeholder Meeting – Regulatory Review Input Form** is available [here](insert link) and at the end of this agenda for those wishing to submit written comments. Completed forms may be submitted before or during the meeting. Public comments will be accepted until the meeting is adjourned.

## AGENDA

1. **CALL TO ORDER**

2. **PUBLIC COMMENT**
   All public comments should be brief and concise to allow all interested individuals an opportunity to speak. Comments will be limited to three (3) minutes per individual. Public comment will not be restricted based on viewpoint, but shall be within the jurisdiction of the Division.

3. **NAC 532—STATE ENGINEER: OVERVIEW, STAFF RECOMMENDATIONS, AND STAKEHOLDER INPUT**
   NAC Chapter 532 addresses water resource violations, enforcement actions, administrative penalties, and related proceedings under the authority of the Nevada State Engineer.
   https://www.leg.state.nv.us/nac/NAC-532.html

4. **NAC 533—ADJUDICATION OF VESTED WATER RIGHTS; APPROPRIATION OF PUBLIC WATERS**
   NAC Chapter 533 addresses the procedure for protested hearings before the State Engineer and applications for extension of time, which are administered by the Nevada State Engineer.
   https://www.leg.state.nv.us/nac/NAC-533.html
   https://www.leg.state.nv.us/Register/2026Register/R012-26AP.pdf

5. **NAC 534—UNDERGROUND WATER AND WELLS: OVERVIEW, STAFF RECOMMENDATIONS, AND STAKEHOLDER INPUT**
   NAC Chapter 534 addresses regulations related to well driller licensing and well construction requirements administered by the Nevada State Engineer.
   https://www.leg.state.nv.us/NAC/nac-534.html
   https://www.leg.state.nv.us/Register/2025Register/R027-25AP.pdf

6. **NAC 535—DAMS AND OTHER OBSTRUCTIONS: OVERVIEW, STAFF RECOMMENDATIONS, AND STAKEHOLDER INPUT**
   NAC Chapter 535 addresses regulations related to dams and other obstructions under the authority of the Nevada State Engineer.
   https://www.leg.state.nv.us/nac/NAC-535.html

7. **PUBLIC COMMENT**
   All public comments should be brief and concise to allow all interested individuals an opportunity to speak. Comments will be limited to three (3) minutes per individual. Public comment will not be restricted based on viewpoint, but shall be within the jurisdiction of the Division.

8. **ADJOURNMENT**

*Note: Items on the agenda may be taken out of the posted order, items may be combined for consideration, and items may be pulled or removed from the agenda.*

Notice of this meeting was posted in the following locations:
*Department of Conservation and Natural Resources, 901 S. Stewart St., Carson City, Nevada*
*Nevada State Legislature, 401 S. Carson St., Carson City, Nevada*
*State of Nevada Campus, 1 State of Nevada Way, Las Vegas, NV 89119*
*Nevada State Library and Archives,100 N. Stewart St, Carson City, Nevada*
*NDWR Elko Office, 1250 Lamoille Hwy, Suite 940, Elko, NV*
*NDWR Southern Nevada Branch Office, 770 E Warm Springs Rd. Suite 270, Las Vegas, NV 89119*

Notice of this meeting has been posted to the Division's website at http://water.nv.gov, Nevada Public Notice website at https://notice.nv.gov/, and Nevada Legislature Administrative Notices at https://www.leg.state.nv.us/App/Notice/A/

We are pleased to provide reasonable accommodation for individuals with disabilities who wish to attend the meeting. If special accommodations or assistance at the meeting are requested, please notify our office by writing to the Division at 901 S. Stewart St, Ste 2002, Carson City, Nevada, 89701; or by calling 775-684-2800 no later than five (5) working days prior to the scheduled meeting. You can also email ndwr-regscomment@water.nv.gov

To obtain support material for the agenda please email ndwr-regscomment@water.nv.gov call 775-684-2800 or write to Division at 901 S. Stewart St, Ste 2002, Carson City, Nevada, 89701. Materials will also be posted on https://water.nv.gov/index.php/bulletinboard/regulations/well-driller-regulations/.

**Public Stakeholder Meeting – Regulatory Review Input Form**

**Nevada Division of Water Resources**
**Executive Order 2026-003 – Regulatory Review**

**Wednesday, October 28, 2026 | 2:00 p.m.**

Thank you for participating in the Nevada Division of Water Resources' regulatory review process pursuant to Executive Order 2026-003. This form provides an opportunity to submit comments on staff-proposed regulatory amendments or recommend additional regulations for clarification, amendment, streamlining, or repeal.

Your feedback will help identify opportunities to improve regulatory clarity, efficiency, and effectiveness.

## CONTACT INFORMATION

**Name:** _____ **Organization/Affiliation:** _____

**Email:** _____ **Phone:** _____

## AGENDA ITEM / REGULATION

Please identify the agenda item or regulation your comments relate to:

☐ NAC 532 – State Engineer
☐ NAC 533 – Adjudication of Vested Water Rights; Appropriation of Public Waters
☐ NAC 534 – Underground Water and Wells
☐ NAC 535 – Dams and Other Obstructions

## STAKEHOLDER COMMENTS

Please provide your comments, concerns, recommended changes, or alternative proposal. If recommending a regulatory change, please identify the specific change you recommend and the reason for the change.

## ADDITIONAL INFORMATION

If you have supporting documentation or additional written comments, please identify or attach them to this form.

# PUBLIC STAKEHOLDER MEETING TO REVIEW REGULATIONS OF THE NEVADA DIVISION OF WATER RESOURCES PURSUANT TO EXECUTIVE ORDER 2026-003

**Wednesday, October 28, 2026 at 2:00 PM**
Nevada Division of Water Resources
Tahoe Conference Room, 2nd Floor
901 S. Stewart Street
Carson City, Nevada

## MEETING MINUTES

1. **CALL TO ORDER -**
   - Meeting called to order at 2:01 pm on Wednesday, October 28, 2026

2. **PUBLIC COMMENT**
   All public comments should be brief and concise to allow all interested individuals an opportunity to speak. Comments will be limited to three (3) minutes per individual. Public comment will not be restricted based on viewpoint, but shall be within the jurisdiction of the Division.
   - In person:
     - Doug Busselman, Director of Public Policy and Government Affairs, Nevada Farm Bureau (see attached written statement provided).
   - Online:
     - None

3. **NAC 532—STATE ENGINEER: OVERVIEW, STAFF RECOMMENDATIONS, AND STAKEHOLDER INPUT**
   NAC Chapter 532 addresses water resource violations, enforcement actions, administrative penalties, and related proceedings under the authority of the Nevada State Engineer.
   https://www.leg.state.nv.us/nac/NAC-532.html

   Rick Perdomo, Deputy Administrator, provided a brief overview of NAC Chapter 532. Natalie Wood, Deputy Administrator, opened the floor for stakeholder input through public comment.

   Stakeholder input through public comment
   - In person: None
   - Online: None

4. **NAC 533—ADJUDICATION OF VESTED WATER RIGHTS; APPROPRIATION OF PUBLIC WATERS**
   NAC Chapter 533 addresses the procedure for protested hearings before the State Engineer and applications for extension of time, which are administered by the Nevada State Engineer.
   https://www.leg.state.nv.us/nac/NAC-533.html
   https://www.leg.state.nv.us/Register/2026Register/R012-26AP.pdf

   Rick Perdomo and Malcolm Wilson, Deputy Administrators, provided a brief overview of NAC Chapter 533. Natalie Wood, Deputy Administrator, opened the floor for stakeholder input through public comment.

   Stakeholder input through public comment
   - In person: None
   - Online: None

5. **NAC 534—UNDERGROUND WATER AND WELLS: OVERVIEW, STAFF RECOMMENDATIONS, AND STAKEHOLDER INPUT**
   NAC Chapter 534 addresses regulations related to well driller licensing and well construction requirements administered by the Nevada State Engineer.
   https://www.leg.state.nv.us/NAC/nac-534.html
   https://www.leg.state.nv.us/Register/2025Register/R027-25AP.pdf

   Chris Thorson, Deputy Administrator, provided a brief overview of NAC Chapter 534. Natalie Wood, Deputy Administrator, opened the floor for stakeholder input through public comment.

   Stakeholder input through public comment
   - In person:
     - Michael Tancheck noted that he is one of the few people who still has a domestic well inside city limits. He asked whether the Division was considering any regulatory or statutory changes regarding domestic wells. The Division indicated that it was not considering changes at this time.
   - Online: None

6. **NAC 535—DAMS AND OTHER OBSTRUCTIONS: OVERVIEW, STAFF RECOMMENDATIONS, AND STAKEHOLDER INPUT**
   NAC Chapter 535 addresses regulations related to dams and other obstructions under the authority of the Nevada State Engineer.
   https://www.leg.state.nv.us/nac/NAC-535.html

   Rick Perdomo, Deputy Administrator, provided a brief overview of NAC Chapter 535. Natalie Wood, Deputy Administrator, opened the floor for stakeholder input through public comment.

Stakeholder input through public comment

- In person: None
- Online: None

7. **PUBLIC COMMENT**

All public comments should be brief and concise to allow all interested individuals an opportunity to speak. Comments will be limited to three (3) minutes per individual. Public comment will not be restricted based on viewpoint, but shall be within the jurisdiction of the Division.

- In person: None
- Online: None
- Written public comments: Comments received via email are included as attachments to these meeting minutes.

8. **ADJOURNMENT**
   - Meeting adjourned at 2:16 PM

**ATTACHMENTS**

- Item 2 – Public Comment: Nevada Farm Bureau – October 28 Public Statement
- Item 7 – Written Public Comment: Schroeder Law Offices – 2026-10-28 SLO to NDWR re Public Comment to Draft Regulations
- Item 7 – Written Public Comment: Welsco Corp – Regulatory Review Input

Nevada Farm Bureau Statement on Regulatory Review

For the record my name is Doug Busselman, I'm the Director of Public Policy and Government Affairs for Nevada Farm Bureau.

I'm not totally clear on what this process is supposed to be and I'm speaking here on something which deals with extensions of time, but not within the regulation package of NAC 533 that you have for consideration today.

My comments are directed at requirements for extensions of time that are being caused by the inability of the Division of Water Resources to complete simple and straightforward changes in use or place of use in accordance with NRS 533.370 (4). When such change applications sit undecided, within the Division of Water Resources, the permit holder often cannot complete proof of beneficial use on the underlying right. In some cases, there are several rights commingled in one system. The permit holder must continue to file Extensions of Time to hold that right. Each Extension of Time costs the permit holder time and money and it costs the Division of Water Resources staff time that could be spent working on the pending applications.

The examples that have been shared with us indicates that the average time since action each application has become ready for action are approximately 40 months in a couple of basins and 32.4 months in another. The longest pending is approximately 127 months in a couple of basins and 95 months in the other.

The Nevada Farm Bureau urges the Nevada State Engineer and his staff to make every effort to process agricultural water use applications change in accordance with NRS 533.370 (4).

We and those we are working with understand that the changes we are seeking won't be accomplished through regulatory changes that the Division of Water Resources will be able to do. Our intentions are to work through the Nevada Legislature and make legislative changes to alleviate the financial hardship resulting from the Division of Water Resources excessive delays in processing simple and straightforward change applications.

I appreciate you listening to our concerns over the current delays in completing necessary approvals for minor changes to existing water rights and we hope that we will be able to cooperatively work through the legislative process on how these Extensions of Time will be dealt with.

**RE: Public Comment to Draft Regulations for October 28, 2026 Public Meeting**

To Whom it May Concern,

This office represents: (1) the Orovada General Improvement District, a district established under Nevada Revised Statutes, Chapter 318, (2) Petan Ranch of Nevada Inc., a Nevada Corporation, (3) Colvin and Sons, LLC, a Nevada Limited Liability Company, and (4) the Duncan Family Trust. Schroeder Law Office's ("SLO's") clients are municipal water providers, stock owners, and irrigators in the state of Nevada. SLO makes the *enclosed* comments to the Nevada Division of Water Resources' proposed regulations changes on their behalf.

Thank you again for the opportunity to provide public comment during this process. Please let us know if you have any questions at (775) 786-8800.

Very truly yours,
SCHROEDER LAW OFFICES, P.C.

## AGENDA ITEM / REGULATION

Please identify the agenda item or regulation your comments relate to:

☐ NAC 532 – State Engineer
☒ NAC 533 – Adjudication of Vested Water Rights; Appropriation of Public Waters
☒ NAC 534 – Underground Water and Wells
☐ NAC 535 – Dams and Other Obstructions

## STAKEHOLDER COMMENTS

Please provide your comments, concerns, recommended changes, or alternative proposal. If recommending a regulatory change, please identify the specific change you recommend and the reason for the change.

See Attachment A.

## ADDITIONAL INFORMATION

If you have supporting documentation or additional written comments, please identify or attach them to this form.

See Attachment A.

## ATTACHMENT A

### I. Nevada Administrative Code, Chapter 533

First, we generally appreciate the streamlined approach the agency has taken in reforming the regulations regarding the submission of *Applications for Extension of Time*. Specifically, the simplification of the submission under the proposed revisions in NAC 533.470.

However, we harbor concerns with the revisions related to the consideration of such applications. These concerns primarily center around proposed changes associated with the term "affirmative and meaningful" in multiple instances in the regulation and the expansion of discretion and potential risk for subjective determinations of these applications which may change from administration to administration or even application to application.

Comment 1: As used in the proposed revisions of NAC 533.480, the terms "steady application" and "affirmative and meaningful" are redundant as the term "steady application" is previously defined in NAC 533.450(2) in part as "affirmative and meaningful action." Therefore, the inclusion of both terms in NAC 533.480 is not necessary as "affirmative and meaningful" is already incorporated into the definition of "steady application."

Comment 2: We are additionally concerned with the removal of examples of "affirmative and meaningful action" under NAC 533.480(2). The previous water-use-specific examples in the regulation provided concrete circumstances in which an extension request is supported. Likewise, such examples could be used to infer other like-circumstances that may support an extension. In contrast, the proposed revisions include a very specific and limited definition of "affirmative and meaningful" such as construction activities, actual water use, permits from other state or local agencies, and pursing or obtaining access to places of diversion. Removal of the prior list of examples and the severe reduction of the definition of "affirmative and meaningful action" risks preclusion of consideration of additional factors that impact the need for an extension and are evidence of an applicant's efforts to further water development. For example, development of municipal uses does not always manifest as construction activities, especially where municipalities are largely depending on construction timelines of third parties. Therefore, we would urge NDWR to consider a broader definition of "affirmative and meaningful" including but not limited to submission of currently water and/or development plans that incorporate use of water rights for municipal providers.

Comment 3: The additional consideration under NRS 533.480 of an "applicant's statement of intent to place water to beneficial use in the future if the State Engineer determines the statement is supported by actual evidence" is also subjective. With the removal of examples of evidence as described in Comment 2 above, we are concerned that this consideration lacks guidance. Further clarity on what the Division considers "actual evidence" would help applicants understand what is being requested.

### II. Nevada Administrative Code, Chapter 534

Comment 4: We are concerned with the removal of the requirement that prospective well drillers be able to pass a test demonstrating the ability to read a topographic map and provide a public

land survey description of the location of a well. We are hopeful that it is NDWR's intent that this ability is included in the written test retained in the proposed regulations. As NDWR is aware, points of diversion are governed by a public land survey system description and therefore the ability of the driller to determine that location is of the utmost import to ensure that future points of diversion are (1) consistent with permits and (2) do not result in unanticipated conflicts with existing water rights and exempt domestic wells.

WELSCO
DRILLING CORP

**To:** Nevada State Engineer
**Nevada Division of Water Resources (NDWR)**

**Subject: Industry Recommendations for Regulatory Reform**

Dear State Engineer,

As experienced members of Nevada's well drilling industry, we respectfully submit the following recommendations for consideration during the review of NAC 534.

Our objective is to modernize outdated regulations, improve administrative efficiency, and establish practical licensing requirements that reflect today's drilling industry. These improvements can reduce unnecessary burdens on both NDWR staff and drilling professionals while maintaining essential groundwater protection standards.

## 1. Contractor Accountability and Rig Operator Qualifications

We recommend replacing the individual *Well Driller* designation with *Rig Operator*, while placing primary regulatory accountability on the licensed drilling contractor.

The contractor would remain responsible for regulatory compliance, permitting, supervision, and proper well construction. Rig operators would be responsible for demonstrating the practical knowledge and competency required to perform drilling operations.

**Proposed qualifications:**

- Minimum two years of verified drilling experience.
- Three-hour, open-book examination focused on Nevada well construction regulations.
- Proctored examinations offered at approved local community colleges or testing centers.
- Scheduled testing on the 1st and 15th of each month, with adjustments for holidays.

Testing should measure an operator's ability to understand and apply regulations in actual field conditions rather than rely primarily on memorization. This approach maintains professional standards while improving accessibility and reducing unnecessary travel and downtime.

## 2. Advisory Board Reform

We recommend expanding the Well Drillers' Advisory Board's role in regulatory improvement and industry collaboration.

PO Box 5245 – 2510 Beasley Drive
Fallon, NV 89406
(P) 775-423-6619 (F) 775-423-7175
www.welscocorp.com

WELSCO DRILLING CORP

The board should focus on reviewing regulatory infractions and disciplinary recommendations, identifying outdated regulations, evaluating licensing requirements, and recommending practical improvements to NDWR procedures.

Rather than serving primarily as an additional examination authority, the board should utilize its industry expertise to help the State Engineer streamline administrative processes, reduce staff workloads, and address challenges facing Nevada's drilling industry.

## 3. Regulatory Review and Reduction

We recommend a comprehensive review of NAC 534 to eliminate or revise outdated, duplicative, or unnecessarily burdensome requirements.

Federal Executive Order 14192 establishes a regulatory-reduction approach commonly known as the *10-for-1 rule*. Although this directive does not apply directly to Nevada state agencies, its underlying principle provides a useful model for reducing unnecessary regulation.

NDWR should consider a similar review process that prioritizes efficiency, practical enforcement, and measurable public benefit before introducing additional requirements.

Regulations should protect groundwater resources without imposing unnecessary costs, delays, or administrative obligations.

## 4. Online Payments and Electronic Processing

We recommend expanding NDWR's electronic payment and processing capabilities to ensure that waivers, Notices of Intent (NOIs), and other applicable transactions can be completed online.

Electronic payments, immediate receipts, application tracking, and integrated records would reduce processing delays, paperwork, and administrative workloads while improving service to contractors and the public.

## 5. Dedicated IT Support and System Modernization

We recommend dedicated information technology resources to maintain, protect, and modernize NDWR's electronic systems.

Priority improvements should include cybersecurity, reliable online reporting, electronic permitting, system maintenance, and integration of licensing, waiver, payment, and well record databases.

Modern technology is essential to reducing staff workloads, improving accuracy, and providing efficient public service.

PO Box 5245 – 2510 Beasley Drive
Fallon, NV 89406
(P) 775-423-6619 (F) 775-423-7175
www.welscocorp.com

WELSCO DRILLING CORP

## 6. Interactive Mapping and Well Information Improvements

We recommend improving NDWR's existing interactive mapping system to provide essential well location and groundwater information in one accessible platform.

Users should be able to select a proposed drilling location and immediately identify:

- Ground elevation and GPS coordinates.
- County, township, range, and section.
- Hydrographic basin and available parcel information.
- Nearby existing wells, including depths, reported static water levels, and drilling logs.
- Available well construction records and historical groundwater information.

The system should also provide distance measurement tools, searchable well records, and printable location summaries.

Consolidating this information would improve well site planning, reduce errors in regulatory submissions, save contractors time, and reduce routine information requests to NDWR staff.

## Closing Statement

Nevada's groundwater resources must remain protected, but the regulations governing well construction should reflect modern equipment, current industry practices, and the practical experience of qualified professionals.

These recommendations are intended to improve accountability, simplify licensing, eliminate unnecessary regulatory burdens, and modernize NDWR operations.

We respectfully request that the State Engineer consider these proposals and include experienced drilling industry representatives in the regulatory review process.

**Our goal is a regulatory system that is practical, efficient, accountable, and protective of Nevada's groundwater resources—one that serves both the public and the professionals responsible for constructing its wells.**

Respectfully submitted,

**Welsco Corp**

# DWR Regulatory Public Stakeholder Meeting-20261028_140019-Meeting Recording

October 28, 2026, 9:00PM

16m 38s

**DCNR Conf Rm Tahoe 2-E (TEAMS)** started transcription

**DCNR Conf Rm Tahoe 2-E (TEAMS)** 0:07

OK, meeting is being recorded.
This is division of water resources.
I'm Natalie Wood, deputy administrator with the division.
This is our public stakeholder meeting to review regulations of DWR pursuant to executive order 2026-003.
We are holding this meeting.
To solicit recommendations on regulations that may be streamlined, clarified, amended or repealed, the meeting will provide an opportunity for stakeholders to offer input on existing regulations and identify opportunities to improve.
Inputs will be taken on each agenda item after staff presents.
We have public input forms available here and online.
I'm gonna let people in for those that are in person, we have a sign in sheet.
And if you could sign in for those online, please put your name, your organization, and your e-mail address in the chat.
And we will go ahead and call this meeting to order at 2:01 PM on Wednesday, October 28th.
Great. I just wanted to thank everybody for taking time out of their schedules.
OK.
So second item on the sorry map, did you have anything else?
Beautiful for a second.
I think we're good now and thank you for we have Chad online.
I think he's helping me with letting people in. So thank you, Chad, for that help on there.
So item 2 on the agenda, public comment, all public comment should be brief and concise to allow all interested individuals and opportunity to speak.
Comments will be limited to three minutes per individual.
Public comment will not be restricted based on viewpoint, but shall be within the

jurisdiction of the division.
Public comment in person will start there and then go online.
OK.
Thank you.
For the record, my name is Doug Bussell.
I'm the director of public policy and Government affairs for Nevada Farm Bureau.
I'm not totally clear on what this process is supposed to be, but I am speaking here on something which deals with extensions of time, but not within the regulation package.
Of NAC 533.
That you have for your consideration today.
My comments are directed at requirements for extensions of time that are being caused by an inability of the division of water resources to complete.
Simple and straight forward changes in use or place of use in accordance with NRS 533.370 sub four.
When?
Let's change applications.
Sit undecided within the division of water resources.
The permit holder often cannot complete proof of beneficial use on the underlying right. In some cases, there are several rights commingled in one system.
The permit holder must continue to file extensions of time to hold that right. Each extension of time can cost the permit.
Older time and money and it costs a division of water resources, staff time that could be spent working on pending applications.
The examples that have been shared with us indicates that the average time since these actions have been become ready for action are approximately 40 miles, or 40 months. In a couple of basins.
And 32.4 months in another.
The longest pending is approximately 128.
A couple of basins and 95 months in another Nevada Farm Bureau urges the Nevada State engineering staff to make every effort to process agricultural water application changes in accordance with NRS 533.37 Sub four we and those who we are working with UNDERST.
That the changes we are seeking.
Won't be accomplished through regulatory changes.

That the division of water resources will be able to do our intentions every work through the Nevada Legislature and make legislative changes to alleviate the financial hardships resulting from the divisions division of water resources, excessive delays and processing simple and straightforward change applications.
I appreciate you listening to our concerns over the current delays.
And completing necessary approvals.
For minor changes to existing water rights, and we hope that we will be able to cooperatively work through the legislative process on how these extensions of time will be dealt with. Thank you.
Thank you.
Do you have any additional public comment in person?
Do we have any public?
Comment online.
Please raise your hand and we'll go through the order as viewed in the participants.
Not seeing any public comment online.
OK, next agenda item.
NAC 532 state engineer overview staff recommendations and stakeholder input.
Thank you, Rick Perdomo for the record.
Deputy Administrator NHC Chapter 532, titled State Engineer, codifies regulatory procedures that address and resolve violations of Nevada water law. The procedures provide for a finding of alleged violation of violation order, injunctive relief and administrative penalties.
The alleged violations may be reviewed at a hearing before the state engineer and a hearing before an independent advisory committee.
Orders and penalties issued under this chapter may be appealed to State District Court, while the division is not recommending changes to the regulations at this time, the division is interested in receiving comments as to the effectiveness and efficiency of the alleged violation process.
OK.
So at this time, we'll take any stakeholder input through public comment.
Do we have any in person?
None in person. Do we have any online.
OK.
No public comment or stakeholder input online.
And moving to the next item, NAC 533 adjudications of vested water rights,

appropriation of public waters.
Administrator for the record NCC chapter 533, titled Adjudication of Vested Water Rights, codifies the practices and procedures for protest hearings before the state engineer.
The procedure applies to protested applications to appropriate water or to change the place of diversion, manner of use or place of use of an existing water right.
The division is not recommending amendments to the practices of procedures for protest hearings at this time.
NAC 533.
There is another portion within there that is the application for extension of time to complete construction of work or apply water to beneficial use.
Again, this is Malcolm Wilson, the deputy Administrator, division water resources.
The regulations for filing applications requesting extensions of time for filing the proof of completion of work or proof of application of water to men official use.
It provides definitions of terms used in the statute and regulation, required information when filing forms, requesting the extensions of time, and considerations for determining good faith and reasonable diligence.
The division recently completed the formal review and adoption of amendments to the regulations.
These updates were approved by the Legislative Commission and filed July 1st, 2026 with the Secretary of State under LCB file number R 01226. The division makes no recommendation to review the recently updated regulations.
OK.
So we will take stakeholder input through public comment this time anybody in person.
None in person online.
Please raise your hand if you'd like to provide stakeholder input through public comment on this item.
A.
No public comment online.
Moving to the next item, NAC 534, underground water and wells overview staff recommendations and stakeholder input.
Good afternoon, Chris Thorson for the record NAC 534 establishes Nevada's regulations for underground water wells, including well drilling and construction standards, licensing and responsibilities for well drillers, requirements for the

plugging and abandonment of wells and provisions for certain waivers related to water rights requirements.
The division current recently completed the formal review process or review and adoption process to update the licensing requirement for well drillers. These updates were approved and filed with the Secretary of the state on September 24th, 2026 under LCB file R-027-2.
5.
At this time, the division does not have any additional regulatory recommendations pursuant to this executive order.
We are interested in receiving public comment regarding the existing regulations to consider.
Fake stakeholder input through public comment.
Anybody in person?
Sure, why not?
All right, there we go.
Good afternoon.
My name's Michael. Thank you.
City and one of the few people that still has a domestic well inside city limits, very protective of that.
As most of us tend to be, and I was just curious as to whether the division was considering any regulations or statutory changes regarding domestic wells.
I don't believe at this time we are at least at least through.
I understand you guys are getting ready for the legislature, so Yep. So about this time we double check, make sure that you know it's on the record as having addressed my concerns. And thank you for your time.
Thank you so much.
Thank you.
Any additional public comment in person?
Any public comment online, please raise your hand.
OK.
No public comment on lines next item NEC 535 dams and other obstructions overview staff recommendations and stakeholder input.
At the administrator for the record, NEC Chapter 535 titled Dams and Other Obstructions codifies regulations that govern construction, reconstruction, alteration, decommissioning, operation, and maintenance, emergency action plans and

compliance enforcement procedures and practices for dams under state jurisdiction. While the division is not recommending regulatory changes at this time, it is interested in receiving public comment on the Hazard Classification, decommissioning standards and inspections schedules for.
There we go.
Sorry about that.
We had a technical difficulty in Tahoe room. We were kicked out for a second, but we're back in the meeting.
When I watch it just in case, I think it was right when you ended it. Shut down.
Anyone out there, Chad?
Were you guys able to hear Rick's presentation or do we need to repeat it?

CW **Chad Walling** 14:03
I think we heard most of it.
So I.

D **DCNR Conf Rm Tahoe 2-E (TEAMS)** 14:08
Maybe repeat?

CW **Chad Walling** 14:09
I don't. Yeah.

D **DCNR Conf Rm Tahoe 2-E (TEAMS)** 14:09
Just be safe. OK. Perfect. Thank you.

CW **Chad Walling** 14:11
Just, just just last few little bit.

D **DCNR Conf Rm Tahoe 2-E (TEAMS)** 14:14
Rick Perdomo, deputy administrator for the record and AC Chapter 535 title DAMS and other obstructions, codifies regulations that govern construction, reconstruction, alteration, decommissioning, operation and maintenance, emergency action plans and compliance and enforcement procedures and practices for dams under state jurisdiction.
While the division is not recommending regulatory changes at this time, it is interested in receiving public comment on the Hazard Classification,

decommissioning standards and inspection schedules for DANOS that are currently considered low hazard.
OK.
So we'll take stakeholder input at this time through public comment.
Any public comment in person?
None in person any online.
Please raise your hands.
And no public comment online.
Next item on the agenda would be closing public comment.
All public comment should be brief and concise to allow interested individuals and opportunity to speak.
Comments will be limited to three minutes per individual.
Public comment will not be restricted based on viewpoint that shall be within the jurisdiction of the division. Any public comment in person.
Any public comment online, please raise your hand.
I don't see any public comment online, so at this point we will adjourn the meeting at 2:16 PM.
Thank you if anyone online did not please put your name, your organization and your e-mail address in the chat. And then for those in person, if you didn't sign in, please sign in for us.
OK.
I'm going to go ahead and stop the recording.
So there you go.
You could draw better here.
Stop.
