Nevada Division of Water Resources' Annual Groundwater Pumpage and Water Level Presentations for Smith and Mason Valleys

The Nevada Division of Water Resources (NDWR) will give the annual groundwater pumpage and water level presentations for Smith and Mason Valleys on Tuesday, March 24, 2026. The presentations will focus on groundwater pumpage and water levels trends, water supply conditions, and the groundwater pumpage goals for the current year. Separate presentations will be given for Smith and Mason Valleys.

Community members are encouraged to attend to learn about the groundwater conditions in each basin as well as to share comments, offer suggestions, and ask questions regarding water-related issues. Community feedback is essential in helping the State Engineer and NDWR address Nevada's water needs effectively.
