10.	LIST OF REQUIREMENTS FOR TRUCKEE RIVER MAINTENANCE PERMIT
11.	Description of the proposed project, which should include at the minimum: A. Map of area with the project site, surveyed cross sections and established benchmarks shown. B. Drawings of proposed project features. Provide design details, including materials and placement, where appropriate. C. Detailed schedule of work (including the following items). a. List all Best Management Practices (BMP) expected to be implemented (e.g. Sediment fences) b. If water is to be diverted to aid project completion, indicate by what means and give starting and ending dates.
12.	Drawings and surveyed cross sections prepared by a registered Nevada Engineer or Professional Land Surveyor, that; A. Depict the channel upstream, downstream and at immediate area of project. B. Tie survey into nearest, established benchmark (i.e. City of Reno, U.S.G.S., N.G.S.) related to NAVD 1988. C. Indicate date of survey and elevation of waterline. D. Extend cross sections to top of both banks of the flood control channel and show geometry below waterline, where possible.
13.	Provide HEC-RAS model data (electronic) for the following (at a minimum): A. Q = 3000 cfs. B. Q = 6000 cfs. C. Q = 100 year flood. D. Q = 117 year flood.
